A
the shared size
true values
as a CT reads them
median SD over the papers'
SD of the shared size, scale_sd
B
the SDs' scale
median SD over the papers'
Panjabi's SDs multiplied by, sd_scale
C
neighbouring levels
rho, between levels
phi, along the column
correlation of neighbouring levels
correlation set in the generator
D
between measures
canal area with body area
canal w with body area
canal ap with body area
canal ap with canal w
correlation of subject means
correlation between measures, r_between
E
quality against the SDs' scale
any
box
convex
sign
vertebrae flagged (%)
Panjabi's SDs multiplied by, sd_scale
F
the grid
scale_sd 0.02
scale_sd 0.035
scale_sd 0.05
scale_sd 0.07
nearest point
distance from the papers
sd_scale (rho 0.75, r_between 0.4)
