
A
sex, each paper's own men against its own women, papers pooled
endplate_lower_area (tang2016)
disc_w (tang2016)
disc_d (tang2016)
body_area (griffith2016)
body_d (chen2011)
body_d_mid (4 papers)
h_mid (duman2026)
endplate_area (tang2016)
body_w_mid (2 papers)
h_post (duman2026)
h_ant (duman2026)
endplate_lower_depth (2 papers)
endplate (2 papers)
endplate_lower (2 papers)
endplate_depth (2 papers)
pedicle_chord (3 papers)
facet_w_sup (masharawi2021)
disc_h_mean (3 papers)
lateral_recess (yadav2020)
pedicle_w (6 papers)
disc_h_ant (2 papers)
pedicle_h (6 papers)
interpedicular (2 papers)
canal_w (6 papers)
disc_h_mid (2 papers)
foramen_h (2 papers)
disc_h_post (2 papers)
canal_area (2 papers)
pedicle_incl_sag (3 papers)
foramen_w (2 papers)
pedicle_length (2 papers)
canal_ap (10 papers)
lamina_angle (abbas2021)
facet_angle_axial (masharawi2021)
−0.5
0.0
0.5
1.0
1.5
2.0
men minus women, in within-sex SDs (Hedges' g), 95% interval
B
age and body size, each paper's own bands, papers pooled
pedicle_h, body height (yu2015)
pedicle_w, body height (yu2015)
pedicle_w, body weight (yu2015)
pedicle_h, body weight (yu2015)
body_area, age (griffith2016)
pedicle_h, age (yu2015)
disc_h_mid, age (bach2019)
pedicle_w, age (duman2026, yu2015)
disc_h_post, age (bach2019)
disc_h_mean, age (bach2019)
disc_h_ant, age (bach2019)
foramen_h, age (bach2019)
−0.2
0.0
0.2
0.4
0.6
change in within-band SDs (age per decade, body height per 100 mm, body weight per 10 kg), 95% interval
C
shape to sex: one point a printed stratum
pedicle_w

in the population
held out, effect from other papers
0.3
0.4
0.5
0.6
0.7
0.8
0.9
1.0
AUC of telling men from women by this one measure at one level (0.5 is chance)
D
covariate to shape, where another paper prints the same measure
pedicle_w from sex
pedicle_length from sex
pedicle_incl_sag from sex
pedicle_h from sex
pedicle_chord from sex
interpedicular from sex
foramen_w from sex
foramen_h from sex
endplate_lower_depth from sex
endplate_lower from sex
endplate_depth from sex
endplate from sex
disc_h_post from sex
disc_h_mid from sex
disc_h_mean from sex
disc_h_ant from sex
canal_w from sex
canal_area from sex
canal_ap from sex
body_w_mid from sex
body_d_mid from sex
pedicle_w from age
the population's own split
held out, effect from other papers
−0.2
0.0
0.2
0.4
0.6
share of the measure's variance explained (R^2; below 0 is worse than ignoring it)
