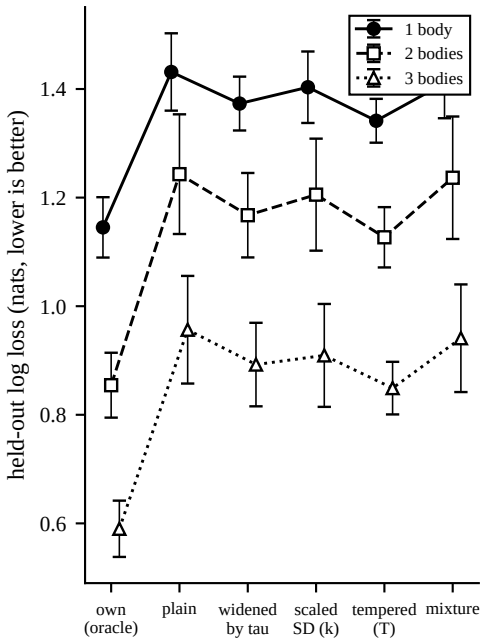
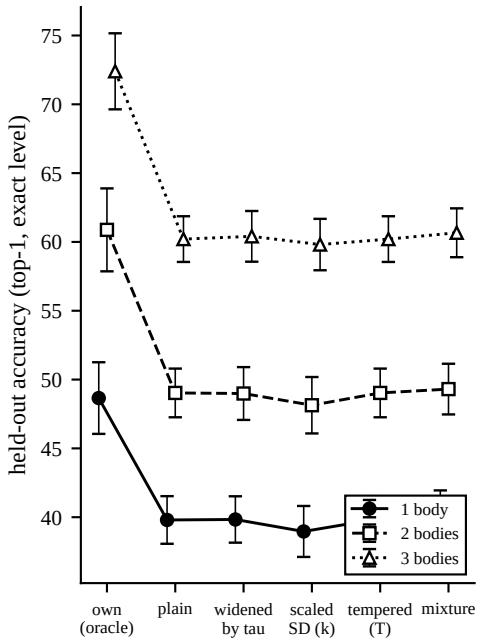
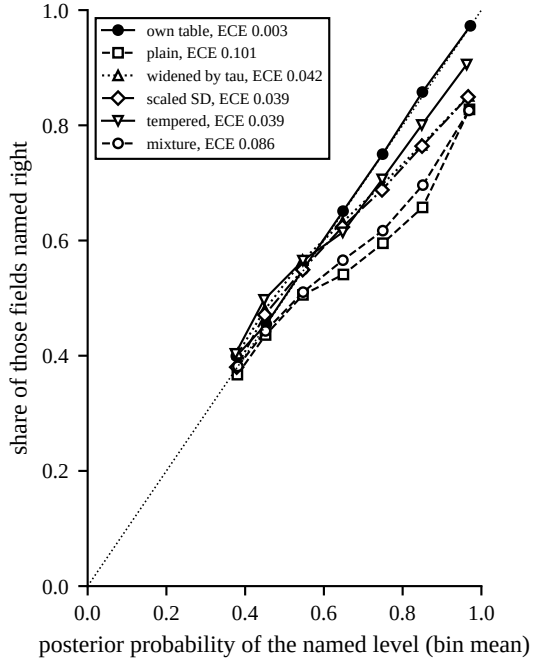
A mean over the 22 held-out populations, bars one SE



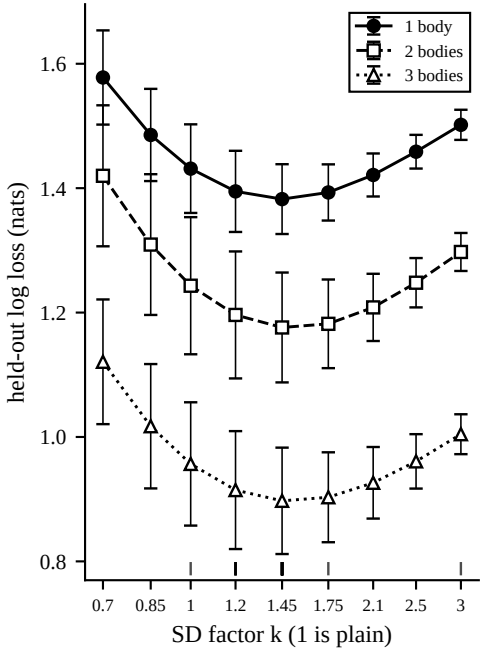
B the same populations; the oracle is the paper's own table



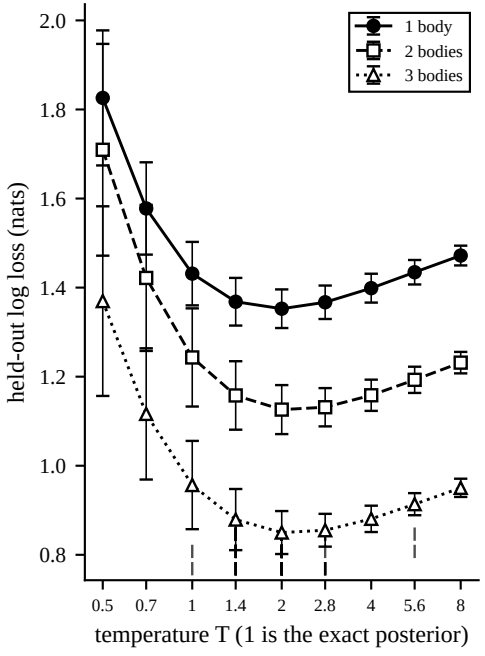
C calibration at 3 bodies, all populations pooled; the dotted line is perfect

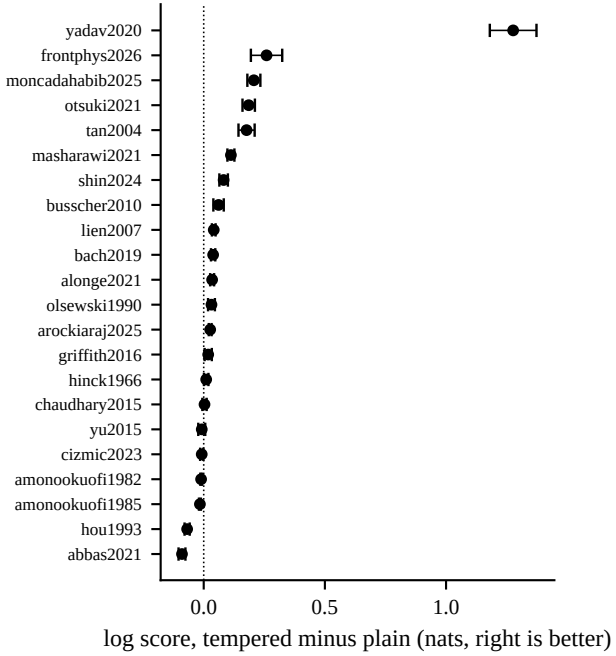


D the knob swept on the held-out populations; the ticks are the inner choices



E the knob swept on the held-out populations; the ticks are the inner choices





F the winner against plain on each held-out population, 3 bodies, bars 95%
