merged: the others pooled
predicted: widened by tau
own means, the others' SD
0
10
20
30
loss against the paper's own table (points named exactly, 3 bodies)
B
the pooled loss over the papers left out, bars 95% of its SE
pooled loss (points named exactly)
every measure the paper prints, merged
every measure the paper prints, predicted
the pedicle's width and height, merged
the pedicle's width and height, predicted
bodies in the field (L1 to L5)
C
the promise at 0.99: the mean over the populations, the whisker down to the least
answers at 0.99 that are right (%)
every measure the paper prints, merged
every measure the paper prints, predicted
a population drawn from the model, merged
a population drawn from the model, predicted
bodies in the field (L1 to L5)
D
8 populations drawn from the model on the seven (grey), and the pooled loss
merged: the others pooled
predicted: widened by tau
loss (points named exactly)
bodies in the field (L1 to L5)
